

postgraduate

# earth, atmospheric and environmental sciences at Manchester

With a large complement of academic staff incorporating a wide range of experience and expertise, our School of Earth, Atmospheric and Environmental Sciences (SEAES) is uniquely placed to offer you a broad spectrum of research and taught postgraduate degree programmes, and to provide authoritative teaching or supervision across a breadth of subjects.

Our thriving community of research students, from the UK and overseas, work on a huge range of topics – some of their own or their sponsors' choosing, and some on research topics proposed by our School each year. Our taught MSc courses also attract students globally, thanks to their strong international reputations as world-leading courses. The primary aim of our taught degree courses is to provide you with an engaging learning experience that will maximise your prospects in a competitive job market and accelerate your career progression. Many of our masters graduates also use the courses as preparation for PhD study.

SEAES equips you with all the resources that you will need to complete your studies successfully. This includes dedicated teaching rooms, high-performance

computer clusters, research laboratories and a postgraduate resource room. We have a strong emphasis on fieldwork, in both the earth and atmospheric sciences, which takes place in an extensive variety of locations around the world. Finally, we offer a friendly and supportive environment in which to learn, with staff always on hand to provide you with academic and personal guidance and advice.

## Manchester offers you...

- Extensive industry links enhancing both ground-breaking research and postgraduate teaching
- Access to specialised equipment and state-of-the-art techniques both on and off-site
- Strong interdisciplinary links across the University
- The opportunity to study in a world class 'research active' environment

# earth, atmospheric and environmental sciences

## Research areas

- Physics and Chemistry of Minerals and Fluids
- Isotope Geochemistry and Cosmochemistry
- Basin Studies and Petroleum Geoscience
- Structural and Petrological Geoscience
- Environmental Geochemistry and Geomicrobiology
- Palaeontology
- Atmospheric Sciences

## Masters courses offered

- MSc in Petroleum Geoscience for Exploration
- MSc Petroleum Geoscience for Reservoir Development and Production
- MSc in Pollution and Environmental Control
- Master of Environmental Sciences, Policy and Management

## Find out more...

For details on all of the above courses and programmes, including entry requirements, topics you may study, teaching, learning and assessment methods, our wide range of facilities and resources, career opportunities and much more, visit our website: [www.manchester.ac.uk/seaes](http://www.manchester.ac.uk/seaes)

### Typical comments from past SEAES postgraduate students:

"The strong industrial links and access to very experienced industry lecturers enhanced my learning experience."

"The variety of teaching methods, in the form of lectures, practical classes, seminars and field trips, enhanced my engagement with the topics that were introduced."

"I found it much easier to understand difficult concepts through practical classes than just listening to a lecture. Hands-on practical experience is invaluable and many of the field trips I took part in have given me memories that will last a lifetime!"
